

# BPMN Diagrams: Choreography

**Choreography:** an interaction between participants. Identify participants responsible for each activity/sub-process.

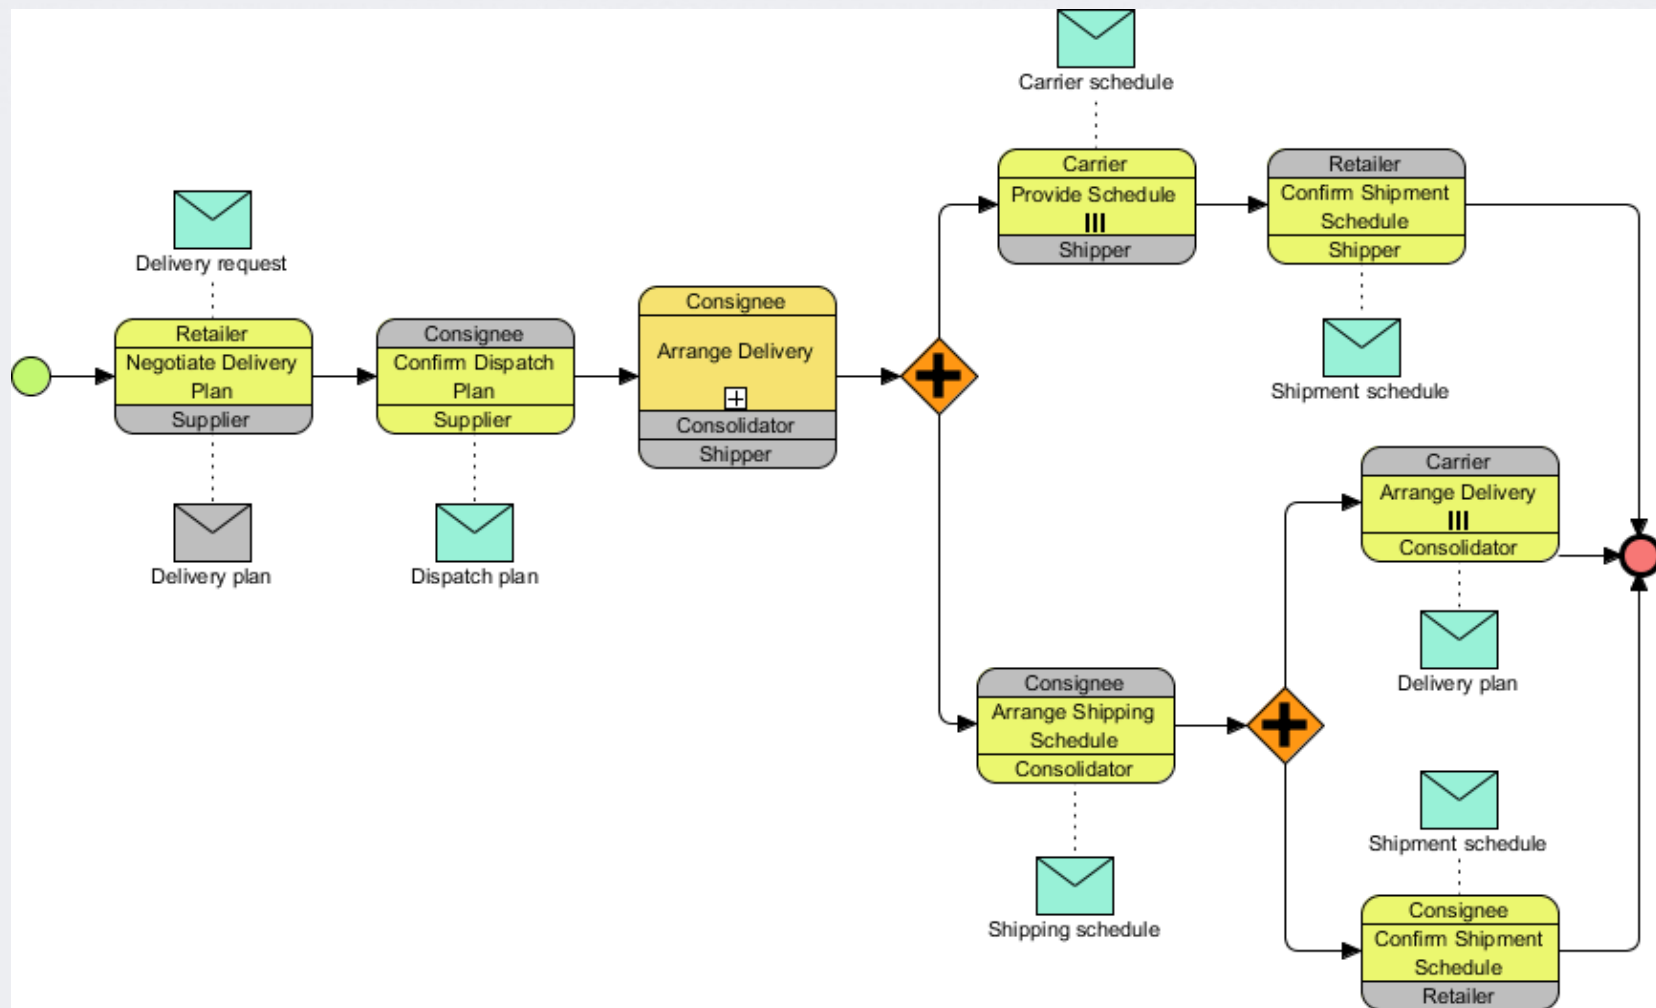

Shaded participants are responding or muted participants. Unshaded participants are the ones that have initiated that process.

shows the interaction between manufacturer and customer in a sale order process. To initiate the process, the customer places an order for an item. The manufacturer then replies to the customer with a confirmation to the order.

# BPMN Diagrams: Choreography

Shows the conversation that happens between different participants to arrange a shipment. The Retailer initiates the process and the Consignee (one who arranges shipments), arranges shipment with the Shipper and Consolidator (one that combines several smaller shipments into one large shipment) for shipping.

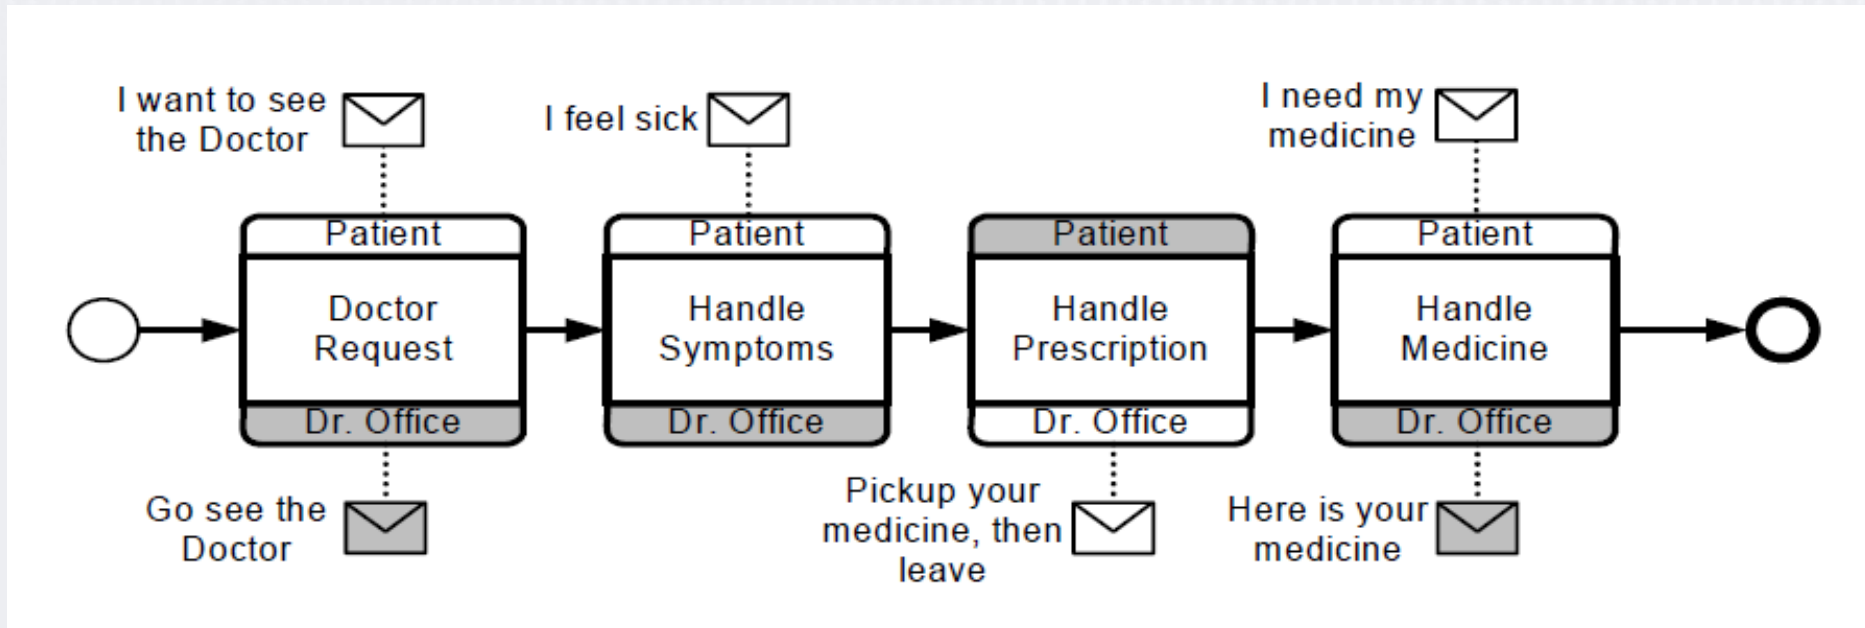

# BPMN Choreography: Exercise-5

A patient wants to see the doctor:

The patient send a request to see the doctor. The Doctor office/Clinic makes an appointment to the patients. At the clinic, the patient provides symptoms and the doctor records them. The doctor decides the needed medicines/drugs and writes a prescription. The patient asks for the medicine, the clinic gives the medicine to the patient as per the prescription.

**Draw a process/choreography diagram for the above scenario**

# BPMN Choreography: Exercise-6

A patient wants to see the doctor:

The patient send a request to see the doctor. The Doctor office/Clinic makes an appointment to the patients. At the clinic, the patient provides symptoms and the doctor records them with the help/presence of the Nurse. The doctor decides the needed medicines/drugs and writes a prescription. The patient asks for the medicine, the clinic gives the medicine to the patient as per the prescription.

**Draw a process/choreography diagram for the above scenario**
