Quiz 4 A

Student Name:

Student ID:

Q1) Write a C program to input a number (**n**) , and find all multiplication from 0 to 10, and print the style as following example :

Input num: 3

Output

3 * 1 = 3

3 * 2 = 6

3 * 3 = 9

..... Etc .

Q2) Write a C program to find the sum and average for the (**x**) marks for (**n**) students, the average and sum should be calculated using two functions **Sum_Marks**, **Average_Marks**, the user should determine what the function calls by entering the **S** for sum , and **A** for average.

Example : User entered A , the program asked to enter the number of students to calculate average (n) , then the program asked to enter the number of marks x , the program should ask the user to enter the x for each student n time .

Good Luck
