{Compare the original signal with 3 harmonics}

{Spectral Density}

{Sample Output}

```
>> Untitled

a0 =
1/2

power =
1/3

ans =
The harmonic # 1
-sin(2*pi*t)/(2*pi)

ans =
The harmonic # 2
-sin(4*pi*t)/(4*pi)
```

```
The harmonic # 3
-sin(6*pi*t)/(6*pi)

POWER IS :

hpow =
49/(72*pi^2) + 1/4
>> 49/(72*pi^2) + 1/4

ans =
0.3190
```

```
>> (49/(72*pi^2) + 1/4)/(1/3)

ans =
0.9569
```

- Power of original signal = $1/3$.
- Power of 3rd harmonics = 0.3190 .
- The ratio is 95.69% .
